General Comment:

On 5/5/2022 COGCC staff, Kris Neidel inspected the Saratoga 44-3 location. Conditions were; sunny, 50 degrees, the ground was slightly wet from recent precipitation. This inspection was in preparation of approving a Form 27 for location abandonment. The following was observed: well was PA, the wellhead had been cut off and lying in a pile of debris, The wellhead had been backfilled, there were flowlines at wellhead that were TA, just off pad to the south was gathering line risers, near the off location flowline was some sort of impoundment that was the shape of a pit but was open on one corner. The offlocation flowlines and impoundment shall be investigated as part of an independent Form 27 (from the 44-3 pad) for compliance with Table 915-1 See attached photos.
