General Comment:

On 05/10/2022, Reclamation Specialist O'Malley conducted a reclamation and stormwater inspection at Organic Energy Company LLC's Allen-66N91W /8SESE Location #313364 in Moffat County, Colorado.

The following compliance issues were observed during this inspection:

- Noxious Weeds: toadflax, knapweed, thistle

Refer to the "Location," "Reclamation," and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

1003 f. Weeds Noxious weeds? <u>F</u>	
Comment	<p><u>Overall interim areas are dominated by perennial grasses.</u></p> <p>Noxious species are widespread on the Location, although not dominant. Species include diffuse knapweed, bull thistle and dalmatian toadflax (CO List B Noxious). Common mullein, bulbous bluegrass and cheatgrass are present (CO List C Noxious). Inspector observed several additional species which may be noxious weeds, but could not be identified as such due to time of year. Operator should implement a weed monitoring program to manage noxious weeds and identify other potential noxious weeds not identified in this inspection.</p> <p>See "Interim Reclamation Comment #1" in "COGCC Comments" section for additional comments.</p>

Interim Reclamation Comment #1	omalleya	05/11/2022
It was observed in this inspection the the working pad area has been reduced and interim reclamation has been performed in areas throughout the Location. Interim areas have not been regraded to match the contour of the surrounding landscape. Some areas appear to still contain gravel. At the time of this inspection interim area vegetation consists of a variety of desirable perennial grasses including western wheatgrass, indian ricegrass, sandberg bluegrass (native) and crested wheatgrass and thinopyrum (introduced). A variety of native forbs are also present along with alfalfa, which is found in the adjacent reference cropland.
