Comment:

Operator has stopped using the DFMF #1 facility and performed final reclamation activities by reclaiming two access roads utilized for the DFMF operations, removed the perimeter berm BMP and put back to natural grade, and removed the southwestern outfall BMP.

The DFMF facility has been returned to the tenant farmer for agricultural activities, which has been planted in winter wheat. Operator disclosed that 8 of 15 ~10 acre pods had EC and SAR exceedances. At the time of this inspection, 7 of the 8 pods with exceedances had some reduced establishment than other pods; however, it is still early in the growing season and the first year. There were other areas in other pods with potential establishment issues.

Pods with exceedances will be sampled and reported to COGCC after each growing season and vegetative transects will be conducted to compare plant growth between pods.	binschusc	05/17/2022
Fertilizer applications were being applied at the time of this inspection.
