**COGCC Comments**

| Comment  | User   | Date       |
|--|--------|------------|
| All disturbed areas must be recontoured, properly decompacted by cross ripping to a depth of 18 inches, have an adequate seedbed prepared, and then seeded with a seed mixture that reflects the surrounding vegetation. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Continue to monitor and maintain the location until the final reclamation requirements are achieved. | CostaR | 05/19/2022 |
