Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Soil samples will be collected spill pathway area, near the former well head location, former separator location, former onsite flowline locations, and any other potentially impacted areas determined by field observations and field screening. At least seven grab samples will be collected from the pad. All soil samples will be analyzed for the complete list of contaminants of concern as outlined in COGCC Table 915-1. At least one background sample will be collected from an adjacent, upgradient or cross-gradient, unaffected area. The background sample will be analyzed for EC, SAR, pH, boron, metals, chloride. Proposed sampling locations are shown in figures with accompanying report.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

Description

	Operator should provide notice to Environmental staff, Kris Neidel (kris.neidel@state.co.us) or 970-846-5097 72hrs prior to mobilization at beginning of all sampling events or Field work on this project.
	The background samples should include all metals in Table 915-1.
	"In consideration that groundwater is expected to be greater than 20 feet BGS, GPE request that Residential Soil Screening Level Concentrations (RSSLC) be used to evaluate potential impacts." At this time, we will proceed with sampling in REM 20666 under the Groundwater Protection standards, this will be revalued after all excavation and sample results are received. If no ground water in encountered, the operator may again request the Residential Soil standards.
