Hi Aaron,

Just a quick note to let you know that TEP received the subject Field Inspection Report on May 25, 2022, for a site inspection that was conducted on May 5, 2022, at TEP's WMC 24-17 location. As noted within the FIR, the corrective action date for the maintenance of storm water BMPs is June 1, 2022. In preparation to perform this work, TEP has initiated the One-Call process to ensure that all buried lines / utilities are properly located. TEP will endeavor to complete this work as soon as possible, however the June 1st corrective action date may not be attainable due to soft / wet soil conditions that persist at the location, and the time required to get the needed One-Call clearances before commencing this work. Assuming that site conditions allow, we expect to begin this work during the week of May 31 – June 3, 2022.

I left a voice mail message for you this morning on your cell phone number communicating this same information. I will also document and submit this timeline in a FIRR as soon as the eForms system will allow. As of this afternoon, the eForms system still does not recognize the Field Inspection Report number.

If you have any questions, please let me know.

Form Resolution [X]

 Field inspection report number[696203718] is invalid
