Comments:

Caerus intends to commence final reclamation operations on 5/25/2022. Consultations have been completed with the Surface Owner (Bureau of Land Management) and reclamation timing and methodologies have been agreed upon, including the Surface Owner's desired seed mix. All portions of the Well Site will be reclaimed per Caerus best management practices, the Surface Operating Standards and Guidelines for Oil and Gas Exploration and Development (BLM "Gold Book", Chapter 6), and COGCC 1000-Series Rules: Temporary perimeter control measures will be installed, gravel will be removed from the working surface and access road, all available topsoil will be salvaged from the planned disturbance area, compaction will be alleviated, the site will be recontoured to blend with the surrounding landscape and reestablish any drainage features, and topsoil will be reapplied. The reclamation area surface will be left rough to promote stormwater retention and prevent erosion. Seed and mulch application will take place during the first favorable seeding window.
