<p>Comment: Operator was controlling fugitive dust along the access road with a water truck. Due to the clayey soil and lack of road base, this was creating vehicle track out onto CR 20.5. Operator did have vehicle control BMPs but were in need of maintenance. COGCC Staff, Chris Binschus, contacted an Operator representative around 1215 hours to communicate the observations. At approximately 1500 hours, Operator had crews to address the vehicle control BMP.</p> <p>Operator indicated that more vehicle control BMPs would be installed and road base would be applied to the access road to prevent track out while still being able to control fugitive dust. Also, a street sweeper would be out to clean up which has been conducting daily sweeps two times a day.</p>						<p>Date: 06/10/2022</p>
<p>Corrective Action: Maintain vehicle tracking BMPs on the oil and gas location to comply with rule 1002.f.(2)F. Additionally, if material is tracked onto county or public roads, contact the appropriate authority.</p>						
<p>Pits: <input type="checkbox"/> NO SURFACE INDICATION OF PIT</p>
