DATA QUALITY REVIEW SHEET

Comments:

Laboratory pH was analyzed thirteen days out of holding time and total dissolved solids were analyzed one day out of holding time. WWL assigned an "H" qualifier to indicate the results are estimated. All other analyses were conducted within recommended holding times. ALS selected field investigation sample Foster 92020 for testing matrix quality control for lab duplicate RPD for specific conductivity, alkalinity (total, bicarbonate, and carbonate), and pH. No sample results were assigned qualifiers by the laboratory with the exception of a "J" qualifier assigned to M+P-xylene and total xylene to indicate a result greater than the method detection limit but less than the reporting limit (result is estimated).

Data Suitability Statement

Based upon this data quality review and your professional judgement, have the data been collected and analyzed in general accordance with the COGCC Model Sampling and Analysis Plan?		<input checked="" type="checkbox"/>	
Are the data suitable for release for incorporation into the COGCC Environmental Database?		<input checked="" type="checkbox"/>
