COGCC Rules (check all that apply)

☐ 1101. Installation and Reclamation ☒ 1102. Operations, Maintenance, and Repair ☒ 1103. Abandonment

Comment: The Waddle 24-4L has been plugged and abandoned; cut and cap work completed. COGCC form 42 notice of start of plugging operations doc #402934392 received 01/24/2022. The associated off location flowline removed; a section of this flowline once shared with Waddle 24-5L. COGCC Inspector met with Oxy contract personnel (Bravo Services) on location. Pressure testing of the Waddle 24-5L off location (wellhead) flowline was in progress. This flowline had recent work completed; T fitting from 24-4L tie in removed and replaced with a 2" sweep. The total length of the flowline is approximately 780' from wellhead to facility.

The flowline pressure test (hydro) was run for 4 hours and recorded on a data logger (crystal gauge); Starting test pressure of 1560 psi. The test recorded minimal pressure deviation (loss < 10%) and adequate stabilization. The tests witnessed is deemed passing/satisfactory per COGCC rule 1104.h.(1)

Corrective Action:

Date:

Facility ID: 249835 Type: WELL API Number: 123-17638 Status: SI Insp. Status: PA

COGCC Comments

Comment	User	Date
As outlined on COGCC form 19 spill report Doc #403068742 received on 06/07/2022: On June 6, 2022, historical soil impacts were discovered following cut and cap operations at the Waddle 24-4L wellhead location. Site infrastructure has been removed and will not be replaced. Excavation and assessment activities are ongoing.	maclarej	06/10/2022
