OPERATOR COMMENTS AND SUBMITTAL

Comments	<p>A nest mapped as High Priority Habitat under Rule 1202.c.(1).H for ferruginous hawk within 0.5 miles of the Travis 1-10 location was changed by Colorado Parks and Wildlife (CPW) from "active" to "destroyed" in the CPW database. CPW communicated the change in status in a letter dated March 28, 2022. CPW waived consultation per Rule 309.e.(3).C.i, finding that the identified habitat and species triggering the consultation is no longer present and unlikely to return to the area. The waiver letter from CPW and the CPW Pre-application Consultation Summary are submitted as attachments with the Form 2A application.</p> <p>Navex Resources proposes to develop two exploratory conventional vertical oil and gas wells, each approximately 6,000' deep. The wells are anticipated to produce oil and condensate, natural gas, natural gas liquids, and inert gases, including helium. The wells will be developed without hydraulic fracturing or stimulation and there will be no flowback. Each location will be 3 acres during development and will be reduced to 2 acres after interim reclamation. The locations will be on non-irrigated agricultural land leased from private landowners. The wells will develop fee minerals. If the exploratory wells are developed for production, all fluids and gas will be sent to an on-site separator. Oil and condensate will be trucked off site for commercial sale. Produced water will be trucked off site approximately twice per month for disposal at an authorized underground disposal well. Natural gas will be piped underground using the existing Ladder Creek Gathering System operated by Tumbleweed Midstream. Tumbleweed will pipe natural gas underground from its Ladder Creek Helium Plant in Cheyenne Wells, Colorado,</p>
