General Comment:

On 06/16/2022, Reclamation Specialist O'Malley conducted a final reclamation and stormwater inspection at the Donald-67N93W /11NWNE Location #313334 in Moffat County, Colorado.

This inspection report is being sent to both Foundation Energy Management LLC #10112 and Quicksilver Resources Inc #10255. Presently, according to COGCC records Foundation Energy Management LLC is the Operator of this Location. Form 10 Change of Operator (doc #402518194) to change the Operator to Quicksilver Resources Inc is "In Process." Until the change of Operator Form is approved by COGCC, both Operators will receive inspection reports.

The following compliance issues were observed during this inspection:

- Noxious Weeds
- Final reclamation not completed per 1004 Rules

Refer to the "Location," "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Type	WEEDS		
Comment:	It was observed in this inspection that Scotch thistle and whitetop (List B Noxious weeds) are present on Location. Cheatgrass (List C Noxious Weed) is widespread. Desert madwort, tall tumble mustard and field pennycress (undesirable plant species/annual weeds) are also widespread.		
Corrective Action:	Conduct weed management to prevent further establishment and spread of noxious weeds and undesirable plant species on the entire Location; ongoing weed management required until location passes final reclamation.		Date: <u>07/02/2022</u>

Comment:

Refer to the "Location" section of this inspection report for weed control corrective action.

It was observed in this inspection that the Location has not been reclaimed per Rule 1004.a. Surface equipment associated with the Location remains on and off Location including guy line anchors, multiple risers and other pipe equipment and power lines. All equipment associated with the Location must be removed and impacted areas reclaimed. The Location has not been recontoured; the perimeter berm and stormwater BMPs remain. It is unclear if the Location has been decompacted. A platy, dense compaction layer is present in soils of the Location. Lack of decompaction is clear in areas adjacent to the Location entrance.

Corrective Action:

Comply with 1004 Rules. Remove all equipment both on and off Location associated with the Location and reclaim areas impacted by removal. Perform final reclamation as applicable on the Location including but not limited to compaction alleviation (cross ripping to a minimum depth of 18 inches) or documentation of previous Location decompaction, berm and stormwater BMP removal and recontouring, and revegetation of the Location. Use a seed mix from the surface owner, or prescribed by the local soil conservation district.

Comment	User	Date
Reclamation originally failed in 2011. Previous inspection #200311763 dated 5/11/2011 noted: "FINAL RECLAMATION SHOULD COMPLY WITH 1000 SERIES RULES" and "DEAD MEN STILL IN GROUND. PIPE RISERS ON LOCATION. LOCATION NOT RE-CONTOURED. ELECTRIC SERVICE ON LOCATION."	omalleya	06/23/2022
