Date: 06/13/2022

Response: CA COMPLETED

Date of Completion: 06/11/2022

Operator Comment: The Rother well produces a small amount of water during production of oil and gas. The amount of water is less than 200 barrels per year. The water is stored on site in a tank. The water is used by a hot oil company to heat oil to clear flowlines. This water is nominally used to clear the company's flow lines. Occasional the hot oil company uses this water to clear flow lines on other wells. The water is used as needed to clear flow lines. The hot oil company uses this water to clear flow lines which benefits the flow of oil and gas. The hot oil company uses its own tank truck to haul the water. Invoices attached

COGCC Decision: Approved
