Comment

Interim reclamation areas have been stabilized with vegetation and are close to achieving reflective percent plant cover of reference areas. Vegetation consists of both native and introduced plant species.

 Operator will be responsible to ensure vegetation is reflective of reference areas during final reclamation activities. Meaning, the Operator will have to use a native seed mix and establish native vegetation that are reflective of reference area species. Refer to the attached inspection photos.

Comment: Operator has failed to maintain and repair stormwater BMPs. Gully erosion was observed throughout the southeastern stormwater ditch BMP area that is directed to a detention pond. Also, wattle BMPs are in need of repair along the southern stormwater ditch BMP area. The detention pond captured the sediment from the gully erosion and other areas and there was no discharge observed off location.	
Corrective Action: Install and repair required BMPs per Rule 1002.f.(2)C	Date: <u>07/28/2022</u>
Pits: <input type="checkbox"/> NO SURFACE INDICATION OF PIT
