General Comment:

[COGCC Inspection Report Summary](#)
On Thursday 6/30/22 at approximately 12:30 hours, I, Inspector Corey De Paolo, Conducted an on-site inspection at CHEVRON USA INC WILSON CREEK UNIT-62N94W /4NWSE. Location #316060 in Rio Blanco County Colorado.
While there, I observed a workover rig fire that occurred during plugging operations. I spoke to the Chevron representative and he stated that the fire occurred approximately 5:00 P.M on 6/29/22 and that the well was under control. The blind rams where set on the BOP. Additionally Chevron had a consultant from Wild Well on location. Over next few days Chevron will be bring in a crane and shears to remove the damaged Ranger workover rig and get back on the tubing string. No major damage to production equipment was visible and there did not appear to be any major releases of fluids at the time of inspection. I was only able to get within 30 yards of the wellhead due to a police line that had been established. A follow up inspection will be conducted when better access to location is available.
This is a summary of inspection report.
