REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

Basis for Closure:

☐ Corrective Actions Completed (documentation attached, check all that apply)
☐ Horizontal and Vertical extents of impacts have been delineated.
☐ Documentation of compliance with Table 915-1 is attached.
☐ All E&P Waste has been properly treated or disposed.
☒ Work proceeding under an approved Form 27 (Rule 912.c).
 Form 27 Remediation Project No: 23850
☐ SUSPECTED Spill/Release did not occur or was below Rule 912.a.(5) reporting thresholds.

OPERATOR COMMENTS:

Caerus plans to remove the entire pipeline and replace it with a surface pipeline. A point of release has not been identified to date on the pipeline associated with this Form 19, indicating a false report of a failure in the pressure test. The pipeline will be excavated, field screened, and sampled per Rule 915.e.(2).B. to determine the vertical and horizontal extent of any contamination.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.

Condition of Approval

COA Type	Description
1 COA	Based on review of information presented it appears that no additional spill reporting via the Form 19 is necessary at this time, and COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if surface and/or ground water is found to be impacted, then further investigation and/or remediation activities will be required at the site.
