**General Comment:**

This is an environmental inspection to witness confirmation sampling for Remediation Project 19938. Any corrective actions from previous inspections that have not been addressed are still applicable.

On July 11, 2022 COGCC environmental staff was on site with and at the request of KPK/Marcom to witness confirmation sampling adjacent to the pond where impacted soils had been stored during spill clean-up. Marcom collected two samples from the area for metals analysis; one sample was collected from a scraped area and one sample was collected from the surface. While on site COGCC staff also talked with a representative of the surface owner regarding sampling and site security.

Confirmation email for sampling notice is attached.
