Please Note: Due to river and quicksand this location was moved 20' west and 55' north of where originally staked which makes it 1854' East of the West line and 2033' North of the South Line. (The true center of NE/4SW/4 fell in the bed of a running stream, Bijou Creek. We almost lost a cat in quicksand while trying to make original location.) Original location staked 1874' East of the West line and 1978' North of the South line.
