| | | | | | | |
| Comment: A recent storm event has caused erosion at the culvert outlet. It appears a larger culvert may be needed along with larger rock rip/rap outlet protection for stabilization. There is also runoff erosion occurring at the west side of the location. BMP's must be implemented in accordance with good engineering practice and must be maintained. | | | | | | Date: <u>08/30/2022</u> |
