FACILITY - API Number: 05-123-00 Facility ID: 482625

Facility Name: UPRR 43 Pan Am I #23 Number:  
Qtrqr: SESW Sec: 11 Twp: 1N Range: 68W Meridian: 6  
Latitude: Longitude:

CORRECTIVE ACTIONS:

1 CA# 163678

Corrective Action:

Date: 08/03/2022

Manage waste in compliance with Rule 913.b.(5)i-v, Operator's waste management plan, and COGCC Guidance 913.b.(5)B i-v.

Response: CA COMPLETED

Date of Completion: 08/02/2022

Operator Comment: In response to Field Inspection Report document #691201639, please note that the requested corrective actions have been completed. Attached is photo documentation that the excavated impacted soil is being managed in accordance with KPK's waste management plan and COGCC Rule 913-b.(5)i-v. Excavated soil is stockpiled in a bermed and lined containment area. Signage has been added indicating soil types.

COGCC Decision: \_\_\_\_\_

COGCC Representative:

**OPERATOR COMMENT AND SUBMITTAL**

Comment: To provide clarification to the general comment regarding KPK's leak identification method, KPK has responded that they did not use produced fluids to identify the leak as was inferred from the initial Form 19. Since KPK was initially unsure if the leak location was from a KPK-operated facility, KPK shut in nearby wells individually and evaluated for a response in the leak following a shut-in. KPK was able to determine that the leak was from the UPRR 43 Pan I#23 flowline once that well was shut in. The flowline then remained off and KPK initiated a spill response, including removal of fluid from the line. KPK's response to the spill is in accordance with their Spill Response Plan and did not contribute to further releases of produced fluids.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
