**Inspected Facilities:**

Facility ID	Type	Status	Status Date	Well Class	API Num	Facility Name	Insp Status
478842	Flowline System	AC	12/17/2020		-	North McCallum System	EI

**General Comment:**

On 8/3/2022 COGCC staff Kris Neidel observed this section of flowline; KPK had exposed approximately 30 liner feet of flowline, it appeared that the flowline was approximately 4 feet deep, there were three lines in the same excavation, bedded with what appeared to be native soil/rock, KPK stated that the flowline was exposed to see how the pipe "looked", the lines appeared to go from the building (near 40.784523,-106.244003) to the southwest (this is consistent with how this flowline is represented in the COGCC database), No fluid or hydrocarbon staining was observable in the open excavation. COGCC staff was scheduled to meet with KPK and KPK's Environmental contractor, MarCom. COGCC staff, Kris Neidel received a voicemail from MarCom while in route to the meeting, at 10:37am, the message was not received until that afternoon. Upon arrival, KPK staff Jeff Bosley notified Kris that the meeting was pushed to 8/11/22 due to medical appointment. (No Photos attached)
