Operator Comments:

The current BMP "Cuttings samples from each interval (surface casing, intermediate, and production) will be collected and will be submitted for laboratory analysis of COGCC Table 915-1 constituents; if cuttings meet Table 915-1 standards, they will be treated as non-E&P waste and disposed of in the three-sided containment area at the Annex Cuttings Facility" will be revised to "Cuttings samples from each interval (surface casing, intermediate, and production) will be collected and will be submitted for laboratory analysis of COGCC Table 915-1 constituents; if cuttings meet Table 915-1 standards, they will be treated as E&P waste and disposed of in the cuttings trench at the Annex Cuttings Facility."

Laramie requests to revise language regarding the disposal of excess cement in the Waste Management Plan. The following is the revised language for disposal of excess cement: "After cementing, any excess cement will be pumped into tanks and hauled to disposal. A tank will be on location for cement pump flush and washup after operations."

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
