

Harambe 2920

304.c.(18): Water Plan

A plan identifying the planned source of water for drilling and completion operations including:

- A.** The planned source and volume of all surface water and Groundwater to be used and the coordinates of the planned source of water;

Water Volume: ~2,823,700 bbl (Drilling: 4000 bbl, Completions: 2,819,700 bbl)

Water source wells listed below:

40° 5'13.58"N, 104°25'59.70"W

40° 4'49.89"N, 104°26'15.20"W

40° 4'37.35"N, 104°26'16.08"W

40° 4'30.45"N, 104°26'15.25"W

40° 3'43.02"N, 104°25'24.41"W

The water is ground water.

- B.** The seller's name and address if water is to be purchased;

Tallgrass Water

370 Van Gordon Street,

Lakewood, CO 80228

- C.** If recycled or reused water is anticipated to be used, a description of the source of that water, background concentrations of chemicals listed in Table 437-1, and anticipated volumes to be used in addition to the reuse and recycling plan requirements of Rule 905.a.(3);

Not applicable

- D.** If fresh water is anticipated to be used, a description of why the Operator does not intend to use recycled or reused water.

Proper storage of large volumes of produced water are not feasible for our operations. Using produced water without infrastructure would increase our truck traffic. Current water use is piped in via temporary poly line.
