1004.d. FINAL VEGETATION TRANSECT

TRANSECT RESULTS OF DISTURBED AREA% _____

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: The access road and location have not been reclaimed. There are compacted soils along the access road. The access road off of the county road needs to be recontoured and fence reinstalled. There are areas at the location with no vegetation establishment and there are undesirable weeds. Seeding will now need to be performed in the fall season. Previous corrective action has not been completed. The location remains out of compliance until reclamation is completed.

Corrective Action:	:Comply with 1004 Rules.	Date	03/15/2022
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>
		Multi-Well Location	<input type="checkbox"/>

COGCC Comments

Comment	User	Date
All disturbed areas must be recontoured, properly decompacted by cross ripping to a depth of 18 inches, have an adequate seedbed prepared, and then seeded with a seed mixture that reflects the surrounding vegetation. Establish vegetation with total perennial, noninvasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Continue to monitor and manage this site until Final Reclamation has Passed.	CostaR	08/12/2022
