## OPERATOR COMMENTS AND SUBMITTAL

Comments Pad 25B is proposed to be a new temporary water support pad. It will not contain wells. It will be used for modular large volume tanks during well completions. Two types of water storage are planned during completions. (1) Recycled produced water to use during well completions. (2) Water from well completions to be used for subsequent well completions or stored for disposal in a proposed Class II Underground Injection Control well on CPX's existing Well Pad 25A. Pad 25B is not located in HPH. Pad 25B received CPW's written agreement with BMPs and other avoidance measures on June 14, 2022 under Rule 1202.c.(2).C for the temporary reroute of an approximately 310' portion of existing road in Rule 1202.c.(1).R HPH. After support for well completions is finished, Pad 25B will be taken out of service. Equipment will be dismantled and removed from the location. The pad will be fully reclaimed.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
