Re: 1-18 Flader  
Sec. 18-3S-60W

Dear Sirs:

In accordance with your request on the above captioned well, I am enclosing the microlog and electric log. This well was cored in the "D" Sand which was non-productive and drilled to total depth, thus, we have no core analysis of the "J" Sand which was productive.

I trust this will complete your files.

Very truly yours,

JEFF HAWKS
