Comment:

Corrective Action:	Based on a review of historic imagery, there appears to be a produced water spill that has impacted approximately 6 acres. Photo #2 is an approximate aerial extent of the spill that shall be cleaned up.	Date 11/14/2022
	Operator should refer to the 915.b. Soil Suitability for Reclamation Operator Guidance. Operator will have to make a root zone evaluation by determining the vertical extent of inorganics and will also have to delineate the horizontal extent.	
	Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.	
	Final reclamation activities shall be complete no later than 11/14/22 or as soon as environmental conditions will permit.	
Overall Final Reclamation Fail Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>		

COGCC Comments

Comment	User	Date
It is COGCC's expectation to have all remediation efforts completed in time for a 2022 Fall seeding.	binschusc	08/16/2022
