COMMENTS:

TEP Rocky Mountain LLC (TEP) respectfully reports the results of recent diagnostic testing on the Federal RGU 33-32-198. The diagnostic testing resulted from the bradenhead annulus indicating sustained pressure during a recent annual bradenhead test performed on June 28, 2022. The Form 17 reporting the results of the recent bradenhead test is included in the "Related Forms" section. The resulting diagnostic testing indicated a potential leak in the production casing. TEP has submitted a Form 4 (Doc # 403119665) requesting COGCC approval of the proposed remedial work to repair the well and eliminate the sustained pressure from the bradenhead annulus. The referenced Form 4 is also included in the "Related Forms" section. TEP will perform a bradenhead test after completing the proposed remedial well work to confirm the bradenhead annulus is no longer exhibiting sustained casing pressure and will report the results of the test via a Form 17.
