Operator Comments:

Through continued monitoring, Caerus has determined final reclamation of this location is complete per Rule 1004.d. Disturbed areas have been built on, compacted, covered, and otherwise stabilized in such a way as to minimize erosion to the extent practicable. The Land Owner's designated final land use has changed since the Well Site was initially constructed and all areas of the Well Site are used for a residential home, parking, and equipment/materials storage. The Land Owner's final reclamation variance request was submitted on 4/20/2018 and approved on 6/28/2020 (Doc #401613847). Caerus is unable to comply with COA #1 of the approved variance request, reducing cut slope to a minimum of 2:1, as this would reduce the flat surface of the former well pad by a large volume and the Land Owner will not allow the work to be performed as he stores material in that area. The cut slope shows no evidence of natural degradation in the 5 years since well abandonment. Activities of the residents, livestock, and pets have resulted in disturbance of the slope, but Caerus is confident this will not result in impacts to public health, safety, welfare, the environment and wildlife resources. Please see the attached photo log depicting current site conditions. Caerus recommends the COGCC contact the surface owner to arrange future inspections: Arriving unannounced is not advised.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
