    On December 30, 1950, drill stem test No. 3 was run on the above
described well with the following results: Total depth 5003', packer
set at 4984½, tool open for 2 hours.

    Recovered small blow of air throughout testing period with no
gas present at the end of the 2 hour period. The flow was too small
to measure with a pitot tube. When the drill pipe was pulled 20 ft.
of slightly oil and gas cut mud was recovered. There was no indication
of water. The flowing pressure was recorded as zero with a 15 minute
