## COMMENTS:

TEP Rocky Mountain LLC (TEP) respectfully reports the results of recent diagnostic testing on the Gibson Gulch Unit 12-30. The diagnostic testing resulted from the bradenhead exceeding the threshold pressure on July 8, 2022. The Form 17 reporting the results of the recent bradenhead test is included in the "Related Forms" section. TEP monitored the bradenhead pressure after performing the bradenhead test and determined that the bradenhead pressure continued to build and sustain pressures above the calculated threshold pressure. TEP is currently experiencing supply chain issues and limited construction crew availability but has scheduled the bradenhead on the Gibson Gulch Unit 12-30 to be connected to the sales line as part of a Pressure Management Plan for this well and will report to the COGCC when the bradenhead connection to the sales lines is completed.
