General Comment:

Environmental inspection of Spill ID 482755 reported by Operator 8/13/2022 for the spill of oil, produced water, and condensate from the Rodgers #1 Flowline.

Environmental Inspections conducted 8/15/2022, 8/17/2022, 8/22/2022, 8/25/2022, 8/29/2022, and 8/30/2022.

At the time of inspection, A Geoprobe crew was onsite with guidance from Marcom to determine the lateral and vertical extents of the spill. KPK crews were also onsite and continued work on the spill excavations using a backhoe. Staining and high hydrocarbon odor were prevalent within the spill excavations.

A total of two excavations and two hydrovac potholes were present on location; two excavations open for flowline repair and a hydrovac pothole conducted as spill response to expose the flowline at the spill location.

Environmental**Spill/Remediation:**

Comment: Remediation continued at the spill location. Crews were onsite, using a backhoe to dig at the excavation. Contaminated soil was emptied into a waste truck and hauled offsite. Obvious impacts remain visible in-situ. Hydrocarbon odors present outside of fencing.

A Geoprobe was on site to determine the lateral and vertical extents of the spill. No impacts were visible beyond 10 feet of the spill excavations in all four directions laterally and vertically.
