General Comment:

On 08/29/2022, Reclamation Specialist O'Malley conducted a Final Reclamation and Stormwater inspection at EOG Resources Inc's Bakers Peak State-611N91W /12NWSE Location #313287 in Moffat County, Colorado.

The following compliance issues were observed during this inspection:

- Vegetation not progressing towards 1004 standards
- Stormwater: gully erosion

This is a shared Location with Location ID #313219. Inspection report for 313219, document #702800619 is identical to this inspection report.

Refer to the "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

TRANSECT RESULTS OF DISTURBED AREA% 16

TRANSECT RESULTS OF REFERENCE AREA% 42

TOTAL % OF DESIRABLE VEGETATION COVER 38

VEGETATIVE COVER FAIL

Comment: This location does not meet reclamation requirements; insufficient vegetative cover. Transects were conducted indicating vegetation is not 80% of the surrounding reference area. See attached transect data results and photos. A corrective action date of 11/15/2022 is given to allow for fall seeding.

Vehicle tracks and livestock grazing are evident.

| Corrective Action: | Comply with 1004 Rules. Conduct additional reclamation in accordance with COGCC 1000 series rules. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be completed no later than 11/15/2022. | Date | 11/15/2022 |

Storm Water:

| Loc Erosion BMPs | BMP Maintenance | Lease Road Erosion BMPs | Lease BMP Maintenance | Chemical BMPs | Chemical BMP Maintenance | Comment |
|------------------|-----------------|-------------------------|-----------------------|---------------|--------------------------|---------|
| | | | | | | |

Comment: Insufficient stormwater and sediment control BMPs in place; there is a gully present at the center of the Location. Poor perennial establishment on the Location does not appear to be sufficient to stabilize the site. This gully is associated with a natural drainage, however, it is more deeply eroded on the Location than in adjacent reference areas to the north and south, which are stable.

Corrective Action: Comply with 1002.f. Implement and maintain stormwater and erosion control BMPs until long-term stabilization has been achieved and site has received a passing final reclamation inspection.

Date: 11/15/2022

Pits: ☒ NO SURFACE INDICATION OF PIT
