Best Management Practices

No	BMP/COA Type	Description
1	Planning	Operations are daylight-only; no lighting impacts are anticipated from operations. BMP for 24hr rig: Site lighting will be shielded and directed downward and inward toward operations to avoid glare on public roads and nearby Building Units.
2	Community Outreach and Notification	Courtesy notifications will be sent to all parcel owners with building units within 1,500 feet of the location letting them know about our subsequent well operations and providing contact information for Kerr McGee's response line and online resources.
3	Community Outreach and Notification	Signs will be placed in conspicuous locations and will include Oxy contact information; the Oxy Stakeholder Relations team will respond to all community member inquiries. The signs will be placed so as not to create a potential traffic hazard
4	Wildlife	This location was reviewed using a desktop method to review publicly available wildlife data (including CPW & COGCC data) as well as internal wildlife datasets and aerial imagery. No risks were identified. All field personal are trained to identify wildlife risks and raise concerns noticed during operations with the Health, Safety, and Environment (HSE) department.
5	Dust control	Water will be placed on dirt access roads to mitigate dust as needed.
6	Noise mitigation	Operations will be in compliance with Table 423-1 requirements. Based off the rig sound signature, rig orientation will be considered to reduce noise levels to nearby building units. BMP for 24hr rig: Noise associated with pipe handling, traffic, and other operational activity will be minimized between 7:00 pm and 7:00 am. Based off the rig sound signature, rig orientation will be considered to reduce noise levels to nearby building units.

Description

Prior to commencing operations, at a minimum, the operator will provide an informational sheet to the owners/occupants of BUs that are nearby and adjacent to the parcel (at a minimum of 1000 feet) on which the well is located. The sheet will include the operator's contact information and the nature, timing, and expected duration of the completion(s), well repair/maintenance, well perforating, temporary abandonment activities, additional equipment installation, and/or testing operations with a workover rig, wireline rig, or other heavy equipment.

Operator will implement measures to capture, combust, or control emissions to protect health and safety, and to ensure that vapors and odors from well completion(s), well repair/maintenance, well perforating, temporary abandonment activities, additional equipment installation, and/or testing operations with a workover rig, wireline rig, or other heavy equipment do not constitute a nuisance or hazard to public health, welfare and the environment. Due to proximity of building units (BUs) all blowdown gases will be controlled.
