Comment:

Corrective Action:	This location does not comply with Rule 1004. Reclamation rules require reclamation activities to be conducted within twelve months of plugging on non-cropland. Well was plugged 03/06/2017. It does not appear any reclamation work has been performed; gravel remains throughout the location and access roads which have not been contoured or regraded; weedy, annual vegetation was observed which includes but not limited to russian thistle and kochia; several stockpiles of dirt were also observed on the old well location and have not been contoured or regraded to reflect reference areas. Refer to attached inspection photos.	Date 11/15/2022
	Comply with Rule 1004. Operator shall contour and regrade access roads and well locations; perform decompaction by cross ripping to a depth of 18" to prepare an adequate seedbed; and reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.
