**RE: COGCC Rule 408.u. Statewide Fracture Stimulation Setback
Canvasback Pad: SWNW Section 32, Township 9 North, Range 60 West
Weld County, Colorado**

To Whom it May Concern,

Mallard Exploration, LLC (Mallard) is applying to the Colorado Oil and Gas Conservation Commission (COGCC) to drill wells on the above referenced pad. COGCC Rule 408.u stipulates that no portion of a proposed wellbore's treated interval shall be located within 150 feet from an existing (producing, shut-in, or temporarily abandoned) or permitted oil and gas wellbore's treated interval without the signed written consent from the operator of the encroached upon wellbore. As currently planned, the following well treated interval is within 150 feet of the proposed horizontal treated interval:

1. Shable Federal LB33-78HN (API: 05-123-36799), 74' offset from Canvasback 32-33-6HN
2. Shable Federal LB33-78HN (API: 05-123-36799), 161' offset from Canvasback 32-33-1HN*
**Outside of 150', but COGCC staff requested consent*

Pursuant to Rule 408.u, the signed written consent shall be attached to the Application for Permit to Drill (APD) Form 2 or Sundry Form 4 for the proposed wellbore. The distance between wellbores measurement shall be based upon the directional survey for drilled wellbores and the deviated drilling plan for permitted wellbores, or as otherwise reflected in the COGCC well records. The distance shall be measured from the perforation or mechanical isolation device.

Per COGCC Rule 408.u, Mallard is requesting operator consent of the encroached upon setback for the existing wells referenced above. Should you find this acceptable, please so indicate by executing this consent and returning to my attention.

If you should have any questions or require additional information, please do not hesitate to contact me. Thank you for your consideration of this matter.

Sincerely,

Erin Mathews
VP of Development
Mallard Exploration
