TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: This inspection was performed along the west side down to the canyon bottom. The noxious weeds appear to be controlled at this time but ongoing weed control should be performed during the next growing season. Overall, perennial vegetation is establishing along the reclamation area but has not reached 80% reference area levels. There are areas that could use additional hand seeding to facilitate vegetation establishment. Continue to monitor and maintain the location until the final reclamation requirements are achieved.
