**COMMENTS:**

KPK received a 90-day frac notice for Oxy's Gaddis pad. This well had a condition of approval requiring additional cement coverage across the deepest water well. KPK is proposing to perforate at 700' and pump 115 sacks of cement to bring the cement up to 229' (75' inside the surface casing). KPK will set a bridge plug above the Codell perforations and complete the cement work. KPK will drill out the excess cement and file a Form 5 once Oxy gives notice that their fracturing operations are completed. KPK will complete this cement work before the frac operations begin on January 12, 2023
