FIELD INSPECTION FORM

 Loc ID 448472 Inspector Name: Trujillo, Aaron On-Site Inspection 2A Doc Num:
Status Summary:

- THIS IS A FOLLOW UP INSPECTION
- FOLLOW UP INSPECTION REQUIRED
- NO FOLLOW UP INSPECTION REQUIRED

Operator Information:
 OGCC Operator Number: 10456
 Name of Operator: CAERUS PICEANCE LLC
 Address: 1001 17TH STREET #1600
 City: DENVER State: CO Zip: 80202
Findings:

- 4 Number of Comments
- 1 Number of Corrective Actions
- Corrective Action Response Requested

ANY CORRECTIVE ACTION(S) FROM PREVIOUS INSPECTIONS THAT HAVE NOT BEEN ADDRESSED ARE STILL APPLICABLE

448472	LOCATION	AC			-	Mesa F26-697	RI

General Comment:

On 9/22/2022 Reclamation Specialist Trujillo inspected Caerus Piceance's Mesa F26-697 location in Garfield County, Colorado.

This is also a follow-up inspection to #696204036, to document compliance for the following corrective actions:
-Stormwater

It was observed that the Location remains out of compliance with COGCC Rules and corrective actions

Refer to the "Stormwater" and "COGCC Comments" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Inspected Facilities

Facility ID: 448472 Type: LOCATION API Number: - Status: AC Insp. Status: RI

Reclamation - Storm Water - Pit

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: [See "COGCC Comments"](#).

Corrective Action: **Comply with Rule 1002.f; install or repair stormwater erosion control BMP in accordance with good engineering practices; ensure BMPs are maintained in proper functioning condition.**

Date: 09/09/2022

Pits: NO SURFACE INDICATION OF PIT

COGCC Comments

Comment	User	Date
<p>STORMWATER</p> <p>Inspection #696204036 observed that stormwater and erosion control BMPs were missing or insufficient; sediment trap on the southwest end of the Location has not been constructed with a properly engineered inlet and/or inlet has not been maintained in a proper functioning condition; runoff from the pad has resulted in gully erosion between the pad and the trap. Erosion degradation was also observed at the southern slope of the trap. Inspection required Operator to comply with Rule 1002.f by 9/8/2022.</p> <p>It was observed in this inspection that work to address the CA have been taken, however, BMPs remain missing or insufficient per good engineering requirements:</p> <ul style="list-style-type: none"> -Degradation at the sediment trap's inlet was repaired, and Operator implemented rock (rip-rap) to armor the inlet, however, geotextile lining was not installed with the rip-rap material in accordance with good engineering practices, resulting in recurring stormwater degradation at the inlet. Additionally, stormwater appears to be moving around the rock-checks installed along the ditch to the inlet; degradation recurring within ditch. -Erosion degradation at the southern slope of the trap has been repaired, however soils have been left exposed; BMPs to stabilize soils until long term stabilization is achieved remain missing or insufficient. -Unconsolidated soils observed within the access road ditch are no longer apparent. <p>This CA has not been addressed and remains applicable.</p>	trujilloam	09/23/2022
