Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Ft. Lupton FD responded to a call of a leak; KPK responded and shut in the wells, lines associated with the release. KPK notified all appropriate Parties, including the Surface Owner and coordinated field efforts to determine the cause and the impact. Field personnel found oil stained soil at 40.09332 / -104.88629. A berm was built around the exposed hole in the ground and a temporary orange construction fence put up around it to prevent un-authorized entry to excavation. Field personnel took a soil sample at the point of release and a background sample. The samples were sent to Summit labs; no results yet. KPK removed stain soil manifest is attached. At present, KPK's initial determination is the steel consolidation line corroded on the bottom, but the investigation is still on-going. A review of the DWR database represents groundwater is greater than 10'. Form will not allow add of additional parties notified: Surface owner Western Midstream was notified on 9/19/22.
