Details of Plan of Work: (State names of and expected depths to objective sands:
Show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement-
ing points, and all other important proposed work.)

On May, 29, 1951, we landed 6 joints 197.68' of 10.75" OD
32.75# H-40 8R Thrd casing at 209.18' from K. B. and cemented
with 150 sacks regular cement 2% calcium chloride mixture. Cement
circulated to surface and allowed to set 36 hours before a pressure
test was applied. After drilling the float collar and 15 feet of cement
500# psi pump pressure was held on the casing for 30 minutes with no
pressure drop. The remainder of the cement was then drilled.
