Details of Plan of Work: (State names of and expected depths to objective sands:  
Show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement-  
ing points, and all other important proposed work.)

We propose to drill a well using rotary tools on the above  
described location. Approximately 200 ft. of 10-3/4" OD., 32.75#, H-40  
casing will be set as surface casing and cemented to the surface by an  
approved method. A 9" hole will then be drilled through the Dakota  
formation, and electric log will be run to total depth. If any formation  
is found to be commercially productive, 7" OD., 20# and 23#, J-55 casing  
will be run through the productive zone and cemented with approximately  
150 sacks of cement by an approved method. The casing will be perforated  
and the well produced.
