Response: CA COMPLETED \_\_\_\_\_

Date of Completion: 09/29/2022

Operator  
Comment:

SIMCOE is actively engaged with this site's stormwater control and mitigation which includes ongoing inspections by a third party consultant. Bare areas were seeded on 09/29/2022 (see the attached report.) Also attached is a PE stamped stormwater management plan which was updated in conjunction with the August construction effort and actual conditions (dated 08/17/2022).

OPERATOR COMMENT AND SUBMITTAL

Comment: Regarding the inspector's comment regarding the partially buried tank: the on location SIMCOE tank is functioning as designed, has secondary containment in place, and the hatch is latched. When the tank is in use for produced water service the activity is a manned operation. The diamond patterned expanded metal access cover is designed to allow an easier visual check for tank level management. Under normal operations, this site's produced water directly flows to the water pipeline system and not the tank.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
