 Sensitivity: None

CPW staff - no action needed, FYSA

Good afternoon Joseph,

Thank you for this consolidated table of upcoming Form 4s (maintenance work) and Form 6s (P&A work), and for the opportunity for CPW to comment since these locations are within one or more High Priority Habitats. CPW also appreciates that you are proactively scheduling your work outside of the sensitive seasons.

I reviewed and concur with your HPH intersects, with the exception of the **red text** below.

I approve of these timing stipulations but would ask you to please prioritize the work within the 0.25 Bald Eagle buffer ASAP, then followed by the 0.5 Bald Eagle buffer, followed by BEWNR, Mule Deer, and last-ANSCW. Please let me know (with at least 2 weeks' notice) if you anticipate that work will go into any of the Bald Eagle limiting buffers.

Otherwise, this should conclude the CPW consult task. If Oxy and/or COGCC have any further questions about any of these, please let me know.

Regards,

Brandon B. Marette, CWB®
 Northeast Region Energy Liaison and Land Use Coordinator
