CORRECTIVE ACTIONS:

1 CA# 161375

Corrective Action: Conduct maintenance on equipment, cleanup stained material and review self inspection processes. COMPLY WITH RULE 1002.(2).D.

Date: 05/04/2022

Response: CA COMPLETED

Date of Completion: 05/02/2022

Operator Comment: Maintenance was conducted on all equipment. Stained and impacted soils from oil spillage around the wellhead, under the flywheel and under the tank load-out valve were removed and replaced with clean soil. See photo Attachment.

**2** CA# 161376

Corrective Action: Install appropriate fittings to allow bradenhead visual inspection as per Rule 419.a.(1), (2). THIS IS THE SECOND NOTICE IMMEDIATE ACTION IS REQUIRED.

Date: \_\_\_\_\_

Response: CA COMPLETED

Date of Completion: 05/04/2022

Operator Comment: The Johnson Stocker well is an early 1900 completion and has a welded surface string without ports for valve installations (typical of early Fremont County wells). Bradenhead valves cannot be installed on this wellhead. NOTE: a bradenhead test for another well was e-filed using an incorrect API number belonging to the Johnson-Stocker well and could not be retrieved for correction or deletion. The Form 17 for the Johnson Stocker well needs to be deleted, as it was not bradenhead tested and incorrectly submitted.

#### OPERATOR COMMENT AND SUBMITTAL

Comment: Operator completed CA's to clean impacted soils around equipment and outside of berm on the Johnson-Stocker well on May 2, 2022. Another CA to conduct a bradenhead test could not be completed because of the the wellhead construction, showing welded surface casing without ports to install valves (typical completions in the early 1900's).

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
