<p>COGCC Inspection Report Summary</p> <p>On Wednesday October 5, 2022 at approximately 12:25PM, I, Inspector Randy Silver, conducted an on-site re-inspection of Document #693505661</p> <p>Location: UPRR 43 PAN AM I #5</p> <p>Operator: KP Kauffman</p> <p>API#: 123-08674</p> <p>County: Weld</p> <p>While there, I observed a shut in well site due to pipeline integrity issues.</p> <p>During this inspection the following possible compliance issues were observed:</p> <p>BMP: Rule 1002 Corrective action date of 10-26-21 See photos 3,4,5,6,7,8,11,12,13,14</p> <p>Fencing: Rule 605c See photos 12,13,14</p> <p>Access: Rule 913.b(5).B.i see photos 12,13,14</p> <p>Waste storage: Rule 913.b.iv see photos 10,9,7</p> <p>I performed a follow up inspection per document #693505661. Upon my arrival it appears conditions have changed since my last inspection. Excavation is quit larger with improper fencing. Open excavation had orange snow fence this is inadequate due to the fact there are home approx...150 to the west. In these yards ther is playground equipment witch suggest children live there. There is no BMP in place around open excavation to prevent run on of sheet flow into the open excavation. It appears in regards to the contaminated stock pile (witch has a sign stating contaminated ) does not appear to have a liner under pile and inadequate bmp's around stock pile are over loaded with sediment and not being maintained.</p> <p>A follow up on this site inspection needs to be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.</p> <p>This is a summary of inspection report.</p>	silverr	10/05/2022
