313288	LOCATION	AC			-	SIMPSON-68N90W 24NESW	RI

General Comment:

On 09/28/2022, Reclamation Specialist O'Malley conducted a reclamation and stormwater inspection at Argali Exploration Company's Simpson-68N90W /24NESW Location #313288 in Moffat County, Colorado.

The following compliance issues were observed during this inspection:

- Noxious weeds
- Unused equipment/debris
- Well is overdue for MIT
- Unmarked anchors

Refer to the "Location," "Reclamation," and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Good Housekeeping:

Type	WEEDS		
Comment:	Jointed goatgrass, a CO List B Noxious Weed is common in areas to the west of the wellhead where it appears codominant with desirable perennial grasses. At the time of this inspection jointed goatgrass seed has matured. A spring corrective action date is being given to allow Operator flexibility in treatment. A variety of treatment options are available to treat this particular species between now and the corrective action date.		
Corrective Action:	Conduct weed management to prevent further establishment and spread of noxious weeds; ongoing weed management required until location passes final reclamation.	Date:	05/01/2023
Type	DEBRIS		
Comment:	Previous inspection #702000248 observed knocked over tank and other equipment parts becoming debris. Inspector required Operator to comply with Rule 606 by 6/17/2022.		
	It was observed in this inspection that equipment observed in previous inspection remains as debris. Original corrective action and date remain applicable.		
Corrective Action:	Comply with Rule 606.	Date:	06/17/2022

Inspected FacilitiesFacility ID: 313288 Type: LOCATION API Number: - Status: AC Insp. Status: RI**Idle Well**Purpose: ☒ Shut In ☐ Temporarily Abandoned Reminder: _____

Comment: Well is overdue for Mechanical Integrity Test. Well has been shut-in since previous MIT in 2013.
MIT requires 10-day notification via Form 42.
Well plugging requires an approved Form 6 Intent to Abandon to Plug Well.
Corrective action from inspection #689806231 remains applicable.

Corrective Action: Produce well after performing successful mechanical integrity test per Rule 417 or plug well. To maintain shut-in status, the well must be able to demonstrate ability to produce without mechanical intervention.

1003 f. Weeds Noxious weeds? F

Comment Areas to the west of the Location have been seeded with perennial grasses, however noxious weeds (jointed goatgrass) are also common. Refer to the "Location" section of this inspection report for weed control corrective action.

Areas of the location not needed for production, or no longer in use have been previously reduced and reclaimed. Interim areas are currently cultivated cropland.

A tank has been removed from the east of the location and the tank battery area appears no longer in use. A pipe remains. The unused pipe equipment must be removed and areas of the location no longer in use are subject to interim reclamation pursuant to 1003 Rules.
