Re: Stromsoe Well No. 1 Site Reclamation

Jeff,

Enclosed is the invoice detailing the equipment and labor costs incurred by Parachini Pastures, LLC for the rough grading and final leveling of the abandoned well site. Approximately 400-500 cubic yards of soil was used to fill in the depression around the well site. This fill was provided by the landowner at no cost to you.

I have informed the COGCC inspector of the status of the reclamation project. We have agreed to schedule a site visit after the agricultural crop has been planted and sprouted next month. You are welcome to join if available.

Contact me with any questions.

Richard Parachini
