Re: Mathewson 32-12-9-55C  
SWNE 12-9N-55W

Dear Bob,

I have received your final plugging report for the Mathewson 32-12, SWNE 12-9N-55W. I was unable to find a verbal to plug in this particular well file. Please call and let me know which engineer gave that verbal approval.

I have mentioned before that I am attempting to get all verbal to plug requests into the well file but there are times that does not happen. On all future verbal approvals include the engineers name you spoke with and the approval date on your final plugging Sundry Notice.

Comments such as "final location leveling completed" or "location ready for final plugging inspection" on the Sundry Notice would be appreciated. When our field engineers go out for a requested bond release or plugging job inspection we assume all dirt work has been completed within 30 days after the well was plugged.

I appreciate your assistance.

Yours truly,

  
Stephan Pott  
Sr. Engineer

xc: Bob Van Sickle
