General Comment:

On 10/10/2022, Reclamation Specialist O'Malley conducted an interim reclamation and stormwater inspection at TEP Rocky Mountain LLC's GIBSON GULCH UNIT-66S91W/29NENW Location #323977 in Garfield County, Colorado.

The following compliance issues were observed during this inspection:
 - Stormwater: rill erosion

Refer to the "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Comment Areas of the location not needed for production, or no longer in use have been reduced and reclaimed. Interim areas are vegetated with perennial grasses. Revegetation is in process. Grazing pressure is evident; grazing appears to be contributing to the degradation of interim areas.

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
Culverts						
Gravel						
Seeding						
Rip Rap						

Comment: Insufficient stormwater and sediment control BMPs in place; rill erosion observed to the southwest of the separators, at the BMP which appears to be intended to discharge stormwater from the Location. The BMP does not appear to have been constructed with proper planning or good engineering practices to minimize erosion, transport of sediment offsite, and site degradation.

Corrective Action: Install or repair required BMPs per Rule 1002.f. Continue to monitor and manage stormwater on the Location. Ongoing stormwater management is required until the site receives a passing final inspection.

Date: 11/17/2022

Pits: NO SURFACE INDICATION OF PIT
